EXPERIENCE / PROJECTS

Frozal Foods ([Link](#))

5 Days

As a front-end freelancer, I spearheaded the development of the website for Frozal Food Company, a leading producer and exporter of frozen Egyptian agricultural products. The primary goal of this project was to establish an online presence that effectively showcased the company's offerings and facilitated global reach and customer engagement.

- 1- Client Collaboration: Worked closely with the client to understand their vision and business objectives for the website.
- 2- Front-end Development: Created a visually appealing and user-friendly website interface using HTML, CSS, and JavaScript, ensuring responsiveness across all devices.
- 3- User Experience Enhancement: Implemented intuitive navigation and interactive features to enhance user engagement and conversion rates.
- 4- Quality Assurance: Conducted thorough testing to ensure the website's performance, compatibility, and security met industry standards.
- 5- Result-oriented Approach: Successfully delivered a professional website, enabling Frozal Food Company to showcase their products and expand their global reach.

E-Commerce API (Node.js MongoDB)

9 Days

Developed a versatile Node.js-based e-commerce API supporting role-based access (Admin, Seller, User) with functionalities including secure user authentication, image management via Cloudinary, Stripe payment integration, robust product management, cart handling, and efficient order processing. Leveraged MongoDB for data management, ensuring scalability and seamless operations across user roles for an enhanced shopping experience.

Social Media API (Node.js MongoDB)

4 Days

Engineered a robust Node.js-based Social Media API with a focus on user engagement and content sharing. The API features a personalized feed that aggregates latest posts from user followings, displays random content when no followings exist, facilitates seamless image and video uploads, supports nested comments, and offers comprehensive functionalities for user, post, and comment management. Prioritizing dynamic content delivery and user interaction, this API fosters an engaging social media experience.

-

Jop Portal API (Node.js MongoDB)

2 Days

Developed a robust Job Portal API using Node.js catering to both companies and job seekers. The API facilitates secure login/signup for companies and seekers, comprehensive user profile management (add, edit, delete), job management functionalities (add, edit, delete), and implements an advanced search system allowing seekers to explore job listings with sorting and filtering capabilities. This API is designed to streamline the job search process, empowering users with intuitive functionalities tailored to both companies and job seekers.
